Ripples

Understanding electromagnetism

Approximately 70% of students do not complete the TU Eindhoven electromagnetism course. This game informs students about the topic and encourages more of them to choose this field as a follow-up study. This game ensures that the basic knowledge is learned better, faster, and more sustainably, in order to reduce the dropout rate.

Awareways

Engaging digital security training

Many employees fail to recognize digital threats properly – they fall for phishing emails, leave their computers unsecured, or misclassify files. For Awareways, we developed 3 serious games that playfully teach professionals better security habits. We've observed that employees retain information better than with traditional courses, resulting in fewer security incidents.

Vasoview

Effectively train to harvest veins

Vasoview is a surgical tool used in EVH procedures. Traditional training methods are often time-consuming and expensive. This game is a realistic and interactive simulation that provides healthcare professionals with an accessible and efficient environment to practice. The result: cost savings and improved EVH procedures.
