

LearnPlus

Case-based learning, launch in weeks!

We craft our interactive experiences using our LearnPlus game-engine. It enables us to efficiently create experiences using customizable building blocks. It enables you to easily adjust game content and see real-time analytics.

Game editor **FOR US & YOU**

Efficiently make, iterate and update learning experiences. Edit content yourself, no developers needed! Powered by AI.

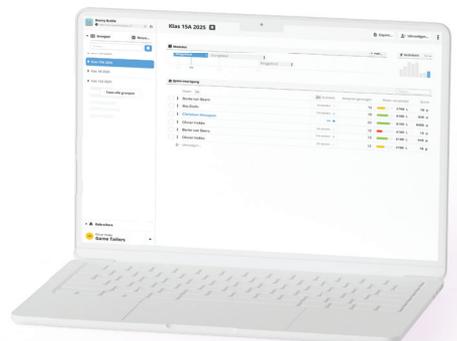

Game platform **FOR PLAYERS**

Easily accessible for players on web and mobile. Possible LMS integration (such as Moodle, ILIAS / SAP SF).

Dashboard **FOR FACILITATORS**

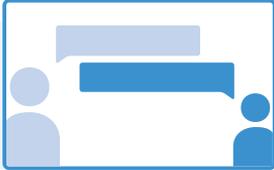

Choose modules, track players' progress in real-time and see analytics reports.

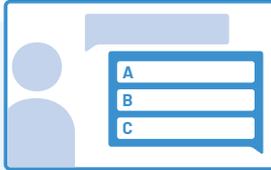

The building blocks

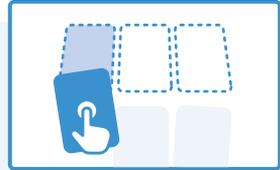

LearnPlus experiences are built on reusable and extendable building blocks. Such as:

Character conversations

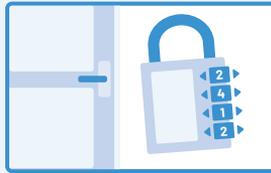

Quizzes

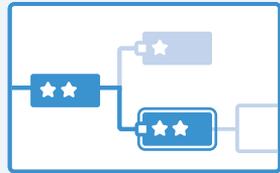

Challenges and puzzles

Visual and sound effects

Escape game mechanics

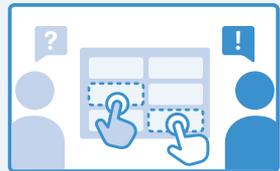

Dynamic content with variables & logic

Environments to explore

Video player

Collaborative play

We also make custom blocks – tailored to your content!

Possibilities

LearnPlus experiences can teach, train or test employees more effectively in a wide range of applications. For instance:

Onboarding. Guide new hires or students through a virtual first day and lower time-to-productivity.

Train compliance. Turn dry policies into decision-based challenges that boost adherence.

Health & Safety drills. Let staff identify hazards and learn to act accordingly in interactive spaces.

Soft-skill sims. Build empathy, negotiation or leadership with branching dialogue.

Interactive videos. Easily adjustable: no need for reshooting. Reduce costs and improve engagement.

Homework. Free up class time by teaching easily and at scale. Spark intrinsic motivation in your subject.

Research. Build and test experimental prototypes faster with custom data acquisition to test your hypotheses.

This is how it works

Option 1

We transform your content into a learning experience.

- **Brainstorm & concept**
Defining learning goals and setting the scope.
- **Sprints & co-creation**
We develop in multiple sprints of 2 weeks with your input and guidance.
- **Live & support**
We make sure everything keeps running smoothly. You focus on the learning.

Option 2

You build your own learning experience using LearnPlus.

- **Workshop**
Session in which we teach you everything you need to know to start building.
- **Custom modules**
We can help you build custom building blocks to expand the possibilities even further.
